

Education Applications

- ▶ Enhance student safety, security and Covid compliance
- ▶ Improve online learning, exam monitoring and student management
- ▶ Improve your planning and decision making

STUDENT SAFETY AND SECURITY

- Integrate Vix Vizion's Imagus video analytics with video management systems on campus, in student accommodation and at access control points.
- Integrate face biometrics with access control systems on campus or in student housing to enhance identity verification and access to secure facilities.
- Monitor camera feeds for people of interest and security threats on campus or in student housing.

ONLINE EXAMS/ LEARNING AND STUDENT MANAGEMENT

- Integrate Imagus facial biometrics capabilities into online student management, student learning or exam proctoring systems to enhance student identity verification.
- Integrate facial biometrics into time and attendance management systems, checking students in and out through face matching, saving time and improving accuracy.

ANALYTICS AND INVESTIGATION

- Monitor student age, gender, emotion, crowd counts, mask compliance by time of day/date to improve planning, decision making and to monitor general student well being.
- Use Imagus forensic investigation tools to quickly analyse on campus or student housing incidents or perform Covid contact tracing.

VIX VIZION AND PRIVACY

Imagus software has been designed with privacy principles top of mind. Imagus can be installed locally on your own secure servers. Video footage and data captured by Imagus is stored at your secure data centre. Images of faces are stored as metadata so that the actual image files can be deleted whenever you require. Metadata can be used for future reporting, forensic analysis or matching against stored or future video feeds. Analytics data can be de-identified and stored as consolidated analytics.
