

Health & Aged Care

- ▶ Enhance patient and staff safety and well being
- ▶ Reduce business risk
- ▶ Contact tracing, incident investigation

VIX VIZION'S IMAGUS VIDEO ANALYTICS SOFTWARE INCORPORATES POWERFUL ANALYTICS CAPABILITIES AND REAL TIME ALERTS TO ENHANCE SAFETY AND WELL BEING FOR PATIENTS, RESIDENTS AND HEALTH CARE WORKERS.

HOSPITALS, SURGERIES AND HEALTH CARE

- Identify and alert on at risk patients, people of interest, and VIP's as they enter facilities or specified locations
- Face recognition for access control to secure areas
- Detection and alerts on unrecognised individuals in secure locations
- Forensic investigation of specific incidents and events
- Improve facility design and people flow to optimise safety and efficiency using video analytics

AGED CARE AND RETIREMENT LIVING

- Recognise and send alerts to staff when at risk residents enter specified locations or attempt to leave without proper safety
- Identify and alert on known and unknown visitors
- Contact tracing and alerts/ investigation tools to trace specific residents to ensure they are safe or have attended therapy and meals as scheduled
- Emotion, age, gender detection/ reporting for customer well being by location, time and date

COVID-19

- Crowd counting/people counting
- Contact tracing through face recognition and historical video analytics
- Face mask detection/ recognition
- Face verification for safe contactless access control

VIX VIZION AND PRIVACY

Imagus software has been designed with privacy principles top of mind. Imagus can be installed locally on your own secure servers. Video streams and data captured by Imagus are stored at your secure data centre. Images of faces are stored as metadata so that the actual image files can be deleted whenever you require.
