

Improve Safety and Care for Aged Care Residents and Dementia Patients

- ▶ Enhance patient and staff safety and well being
- ▶ Reduce business risk
- ▶ Contact tracing, incident investigation

Dementia Patients Safety

- Protect Dementia Patients by providing real time alerts if they attempt to leave an Aged Care facility without a suitable escort.
- As there is a growing need to open up Dementia wings and give patients greater access to the facility and more freedom, we can improve the safety by easily locating them within the facility.

Aged Care and Retirement Living

- Provide real time alerts if persons of interest return to a facility. These people may have been responsible for earlier incidents at the Facility.
- Contact tracing and alerts/ investigation tools to trace specific residents to ensure they are safe or have attended therapy and meals as scheduled.
- Emotion, age, gender detection/ reporting for customer well being by location, time and date.

Other Benefits

- Crowd counting/ people counting.
- Contact tracing through face recognition and historical video analytics.
- Australian made and supported.
- Face verification for safe contactless access control.
- Ranked 2nd in the world in 2022 benchmarking by US NIST organisation for 'Wild Video' environments.
- In use with 2 Australian Aged Care providers.
- Imagus software can work standalone or integrated with your video management system

VIX VIZION AND PRIVACY
